

636 Maple Avenue Intermodal Parking Structure

The Industrial Development Authority issued an \$11,000,000 million Empowerment Zone Bond to assist in financing the construction of 636 Maple Avenue Intermodal Parking Structure in December 2005.

Construction is currently underway on the seven-story concrete parking structure, located within the Federal Empowerment Zone, Central City Revitalization Zone and CRA's Redevelopment Area in Los Angeles on approximately 31,000 sq. ft. of land (Council District 9).

The parking structure will provide much needed parking to the nearby fashion district patrons, as well as tenants in the adjacent Santee Court residential development.
